

JUMBERCA RETURNS

High speed single-faced terry loop machine

4ST48

power of innovation by

CANMARTEX

The recognized quality of JUMBERCA's terry and appearance due to the high regularity of the loops and perfect plating. On the reverse side the ground thread covers uniformly the terry yarn, preventing it from being pulled out, these being highly favorable conditions of fabrics which have to be shared.

This model of machine has conversion kit available to: machine single jersey 4 tracks and/or machine 3-thread fleece.

Standard features:

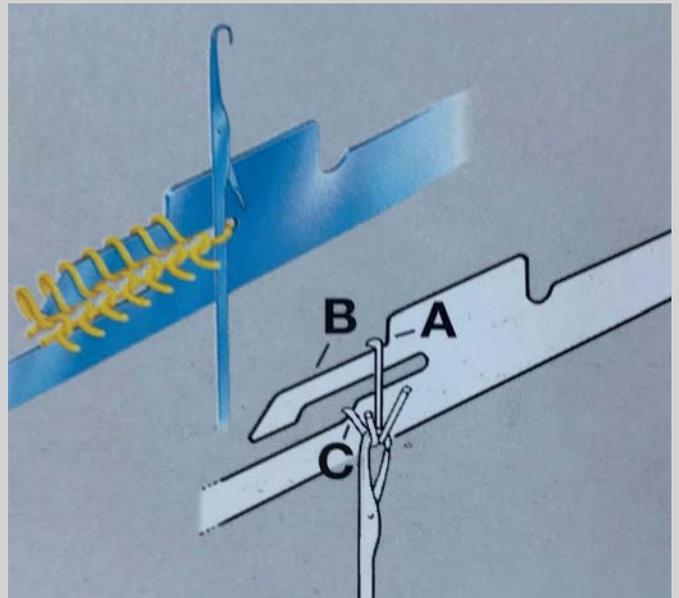

- Solid frame with system of cylinder bearing submerged in an oil bath.
- Central and individual stitch length adjustment.
- Cylinder and needles supplied by GB.
